The Brevini industrial Group is a market leader in two strategic business areas: mechanical transmissions and hydraulic systems.

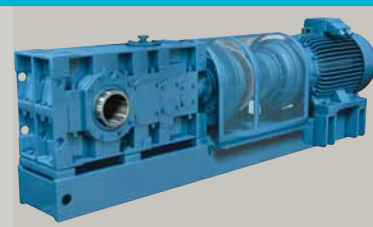

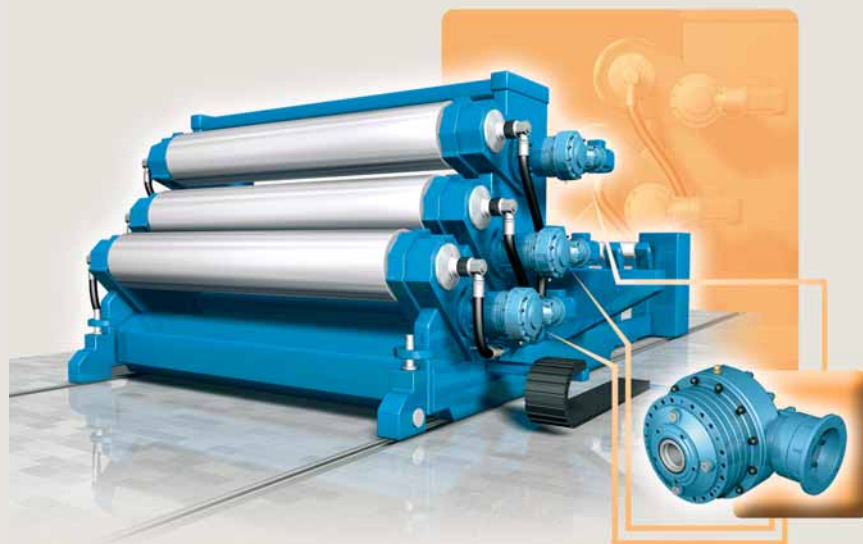

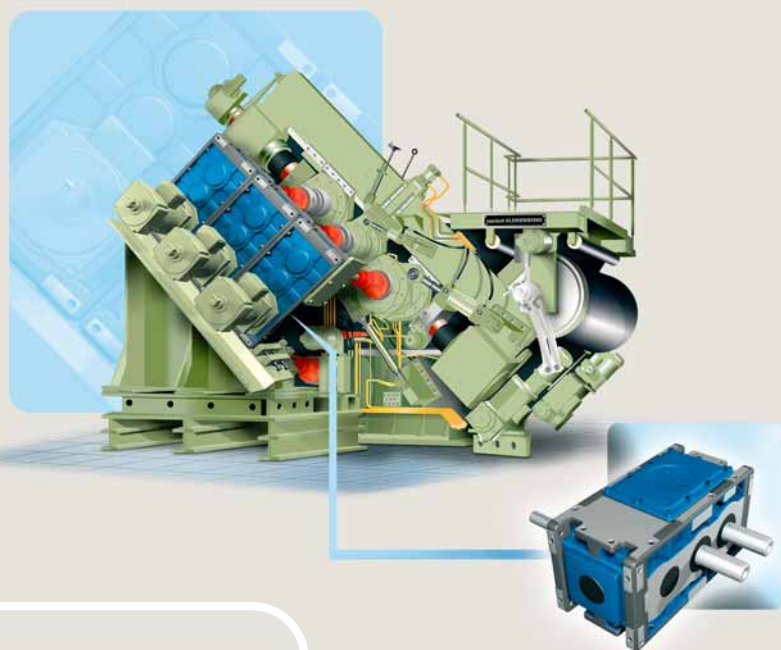

The companies manufacturing planetary gear drives, helical and bevel-helical gearboxes, winches are managed together in the business unit: Brevini Power Transmission.

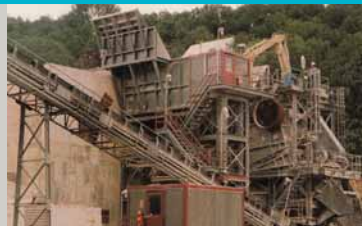

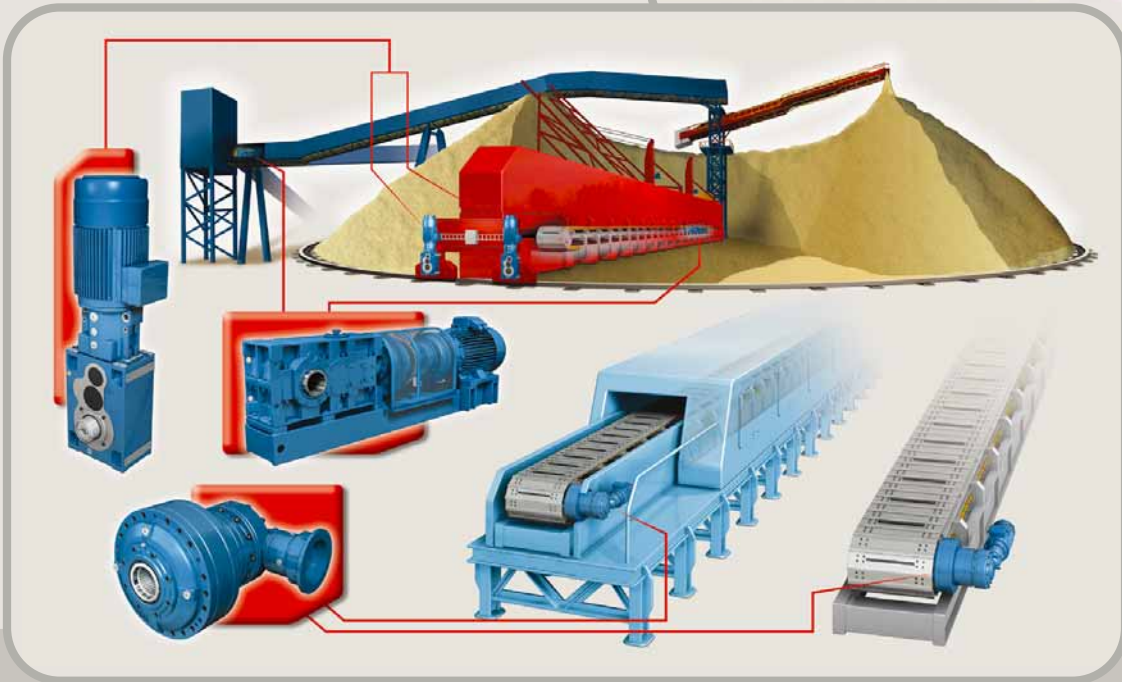

Present with a direct network in the main world markets, Brevini Power Transmission is a global player with strong competitive advantages: full product range, worldwide service, experience in all possible applications, both on mobile machines and on industrial equipment.

Brevini Power Transmission now has a consolidated turnover of 200 million Euro, with 950 employees. The holding company Brevini Group has a turnover of 270 million Euro, employing 1.300 people.

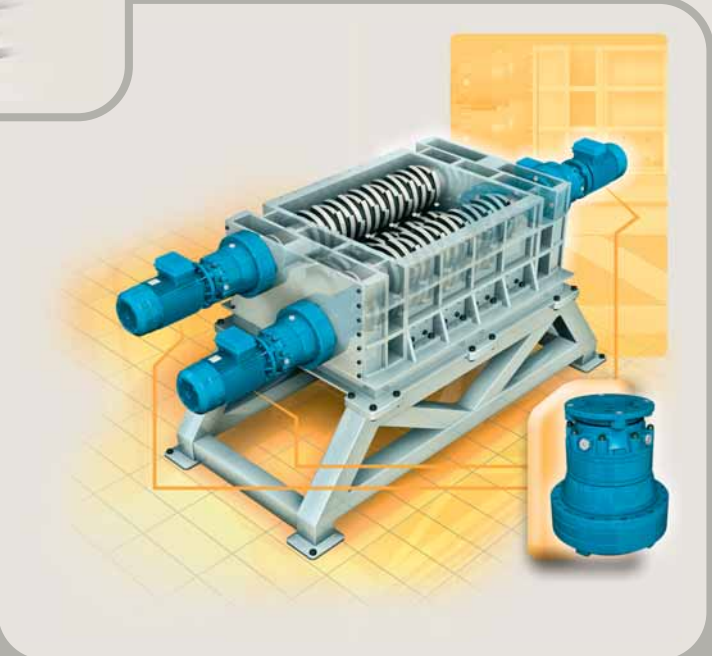

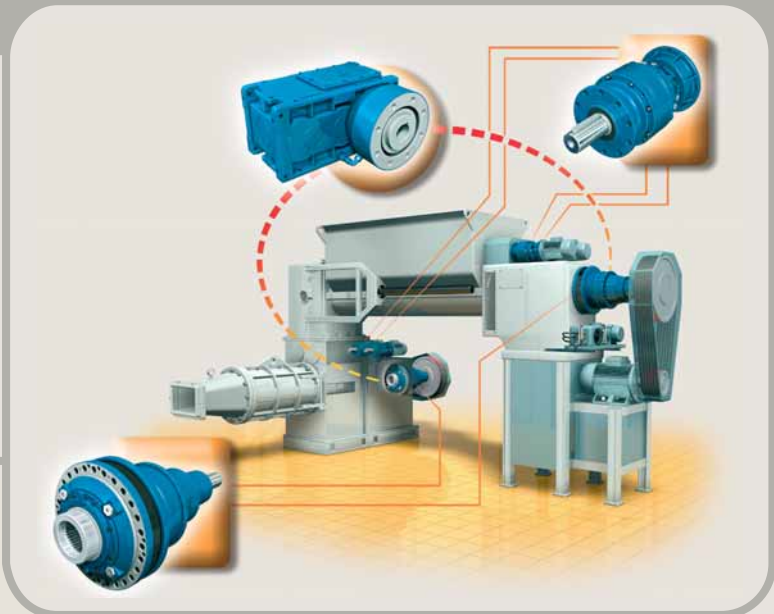

Brevini Riduttori is the one of the major worldwide producers of planetary gearbox technology with subsidiaries in over 25 countries. Founded in Italy in 1960, Brevini has used the higher torque, smaller size and improved efficiency advantages of its planetary gearboxes to revolutionise the transmission of torque in all areas of industry, transport, construction, mining, processing, agriculture, utilities, machine tools and many more.

PIV Drives, founded in 1928 and now part of Brevini Power Transmission, is a pioneer in developing modular concepts for its comprehensive Posired 2 range of helical, bevel helical and extruder gearboxes. This was a far sighted initiative that is benefiting customers across all industries, providing the flexibility to deliver optimized power transmission solutions, both standard and bespoke, quickly with high levels of quality and at competitive cost.
